INTRODUCTION

1.1 Background (RIGHT TO INFORMATION ACT & ITS OBJECTS)

Set act the practical regime of right to information for the citizens to secure access to information under the control of Public authorities, in order to promote transparency & accountability in the working of every public utility.

1.2 OBJECTIVE/PURPOSE OF THIS INFORMATION HAND BOOK

This information hand book is aimed to make suo-motto disclosure in respect of the particulars of the organization, functions duties etc., and standardized information for easy access & understanding by the public as per the provisions of section 4(1) (b) of the Right to Information Act.

1.3 WHO ARE THE INTENDED USERS OF THE HAND BOOK

Citizens, civil society organizations, public representatives, officers & employees of public authorities including PIO's, APIO's and Appellate Officers, Central & State information commission etc

1.4 ORGANIZATION OF INFORAMTION

The information in the hand book is organized in the following chapters

Chapter : 1 Organization, functions and duties

Chapter : 2 Powers & Duties of Officers and employees

Chapter : 3 Procedure followed in Decision making process

Chapter : 4 Norms set for the discharge of functions

Chapter : 5 Rules, Regulations, Instructions, Manual & Records for Discharging functions

Chapter : 6 Categories of documents held by the Public authority under its control

Chapter : 7 Arrangement for consultation with or representation by the members of the public in relation to the formulation of policy or implementation there of

Chapter : 8 Boards, councils, committees and other bodies constituted as part of public authority

Chapter : 9 Directory of officers and employees

Chapter : 10 Monthly remuneration received by the officers and employees, including the system of compensation as provided in regulations.

Chapter : 11 Budget allocated to each agency including plans etc.,

Chapter : 12 Manners of execution of subsidy programmes

Chapter : 13 Particulars of recipients of concessions, permits or authorization granted by the public authority.

Chapter : 14 Information available in electronic form.

Chapter : 15 Particulars of facilities available to the citizens for obtaining information.

Chapter : 16 Names, Designations & Other particulars of Appellate authorities, PIO's & APIO's

Chapter : 17 Other Information

CHAPTER - 1
ORGANISATION, FUNCTIONS AND DUTIES
[SECTION 4(1) (B) (I)]

PARTICULARS OF THE ORGANISATION, FUNCTIONS AND DUTIES

Name of the organization:

ANDHRA PRADESH EASTERN POWER DISTRIBUTION COMPANY LIMITED
OPERATION CIRCLE: RAJAMAHENDRAVARAM

ADDRESS:

Office of
The Superintending Engineer,
Operation Circle, Near Godavari Bund, Ullithota Street,
RAJAMAHENDRAVARAM, E.G.Dt-533101.

FUNCTIONS:

- 1) Sale of Power
- 2) Collection of Revenue
- 3) Service to the Consumers
- 4) O&M of Power Supply System to all the Electricity Consumers

DUTIES :

- 1) To maintain uninterrupted power supply to all Towns & MHQs.
- 2) To comply with the over all standards of performance parameters prescribed by the Honourable APERC.

CHAPTER – 2
POWERS AND DUTIES OF OFFICERS AND
EMPLOYEES [SECTION 4(1) (B) (II)]

SUPERINTENDING ENGINEER (OPERATION)

The areas to be covered are:

(a) Administration: The offices of the Deputy Executive Engineers and the Section Officers will be inspected by the Superintending Engineer as and when convenient and the office of the Executive Engineers will be inspected not less than once a year. He will inspected whether the several registers and returns are properly maintained, whether the progress reports, interruption reports and load record statements are concurrently written up and whether the Executive Engineers and the Dy.Executive Engineers are exercising their checks efficiently and discharging their duties satisfactorily. He will further see that the stores are properly maintained and obsolete materials are not over stored, that not more than the required spares and tools and plant are kept in

(b) **Technical & Commercial:** He will see that the distribution charts and plans and sketches of the transmission lines and sub-stations and other buildings are properly maintained; that the execution of operation, maintenance and construction works are properly executed as per approved design and plans: that interruptions are properly remedied and that the sub-stations and equipments are well maintained. He will further see that the supply to HT consumers is well attended to; that their maximum demands, metering arrangements are all well inspected periodically and that important technical matters are promptly attended to by the Dy.Executive Engineers and the Executive Engineers.

(c) **Financial:** From the commercial point of view, the financial aspect of the under taking is most important. The Superintending Engineer should check, wherever he consider necessary, the following points during his inspections: That the HT power consumers services are periodically inspected by the Dy.Executive Engineers and the Executive Engineers to ensure correct recording of meters so that loss of revenue may not occur; that the maintenance staff and expenditure are kept at the minimum that the collections (wherever attached to sections) are properly watched that the initial record of accounts, work orders are regularly maintained that the imprest accounts are correctly maintained and rendered to the Circle/Executive Office; that no unauthorized works, though in the interest of service, are executed that the accounts returns are periodically and correctly rendered that measurement books and other initial records are properly maintained and work orders closed as expeditiously as possible. He should further check at least a few items of stores whenever convenient and ensure that the bin cards, ledgers etc., are concurrently posted and the quantitative balances agree.

(d) Sale of energy and achievements of targets in release of services, revenue billing and collection of revenues, Review of stuck-up and burnt meters and ensuring prompt replacement with special emphasis on high value services. Review and ensuring prompt and effective disconnections including dismantling of services which are continuously under disconnection for more than 3 months as per B.P. Ms.No.151, dt: 25.8.1993 and as per clause 26.10 of Terms and Conditions of supply.

Identifying area where pilferage is prevalent and taking steps to eradicate the same by arranging continuous raids and prosecuting the offenders. Ensuring review of meter readings, attending to exceptionals on top priority with special emphasis on high value services.

Drawing up a programme and implementing it for quick realization of arrears of revenue.

Ensuring hundred percent collections of current month demand raised and at least 2% of the arrears in each ERO per month.

(e) Operation and maintenance of 33 KV, 11 KV, L.T Lines, Sub-stations, and Distribution and Power Transformers. Ensuring scheduled patrolling of lines and special patrolling consequent to tripping, pre-monsoon inspections, timely tree clearances and rectification of faults for total avoidance of breakdowns. All equipment at all sub-stations to be kept in trim condition and properly maintained as per schedules. Station batteries along with all protective features are to be ensured for providing protection to lines and equipment. Auxiliaries such as Fans, Pumps, O.L.T.C Gears, Compressors (where available) are to be in working condition always.

(f) System improvements, Review of low voltage pockets, and peak readings reached on lines and power transformers and making proposals, for enhancements, new sub-stations, installation of capacitor banks and AVBs etc. Also proposals towards reduction in system losses are to be made keeping system configuration in view.

(g) Construction works such as minor and major extensions,

(h) Rural electrification and urban extensions.

(i) Constant review of failure of equipments and follow up of repairs and also to take steps towards avoidance of failures.

(j) Conduct District-wise, Division-wise, sub-division wise, section-wise, 11 KV feeder-wise, and Distribution Trans former-wise energy audit, arrive at line losses, and take remedial actions to plug the sources of losses and reduce them.

(k) Procurement of decentralized materials for works.

- (l) Budgeting and budgetary control, compilation of accounts in the circle, pre-audit. Review of circle P & L Account, Executive Profit & Loss A/c to control cost and increase revenue for the company to meet the Target Set in.
- (m) Implementing policies, objectives and programmes set up by the DISCOM, monitoring progress there on and reporting to DISCOM.
- (n) See that accidents are avoided by reviewing all cases and ensuring that remedial actions are taken.
- (o) Review of Internal Audit/Statutory Audit/CAG Audit findings in the operational and revenue areas and evolve necessary action to avoid/minimize the occurrence of such situation.
- (p) Marketing / Market development for demand increase or new demand with proper strategy.
- (q) Ensuring preparation of estimates for electrification of un electrified habitations and get it sanctioned by REC.
- (r) Ensuring the release of new services with in schedule time.
- (s) Ensuring preparation of estimates for electrification of un electrified habitations and get it sanctioned by REC.
- (t) Drawing up a programme for inspection of exceptional services generated by CAT.
- (u) Conducting Circle wise, Division wise, Sub-Division wise, Section wise P & L statements every month and take remedial action to plug the revenue losses.
- (v) Ensuring that the performance standards as envisaged in the citizen charter are implemented.
- (w) Ensuring disposal of unserviceable absolute and scrap material lying in the stores.
- (x) Ensuring the release of new services with in schedule time.
- (y) Ensuring proper inter action with consumers & public by conducting meetings with consumers (both LT & HT), people representatives, constituency meetings, sub-station wise meetings. Obtain feed back for proper planning of works.
- (z) Ensuring implementation of directives issued by APERC every year.
- (aa) To take all steps necessary to develop performance orientation among employees to ensure that welfare policies and training activities are carried out for employee motivation and satisfaction.

The Superintending Engineer is responsible to keep sufficient no. of healthy DTRs in his head quarters for replacement of failed DTRs. He should arrange transport and erection of the DTRs at the cost of DISCOM only and should not allow the consumer to incur expenditure in this account. He should ensure that all failed DTRs are replaced after through inspection of connected LT lines and DTRs structures and rectify the defects before replacing sick units. All the failed DTRs are to be replaced in urban areas with in 12 hours and rural areas with in 24 hours.

The Superintending Engineer should interact and obtain feed back from the consumers on replacement of failed DTRs like whether the transformers are being replaced with in resolved time and the expenditure in replacing failed DTRs being incurred by any farmers/consumers.

EXECUTIVE ENGINEER ELECTRICAL (OPERATION)

The areas to be covered are:

a) Technical & Commercial: They will review the register of works, check measure as many major works as possible concurrently as the works are proceeded with ; satisfy that the designs and specifications are correctly followed ; that deviations wherever necessary are brought to his notice for approval by competent authority. They should at least inspect once in six months all the H.T. services in their jurisdiction and report to the Superintending Engineer any important feature detected. The commercial activity of each sub-division is a main feature for the development of load and the Executive Engineers should ensure that this item is well realized by the Deputy Executive Engineers and sufficient progress in investigation made by them.

b) Financial: The Deputy Executive Engineers are primarily responsible for all financial matters, expenditure and revenue. However the Executive Engineers should during their inspections check the initial records of all accounts, works, stores, spares, tools and plant, imprest accounts, measurement books, collections, petty cash books, etc., and take prompt action to communicate to the Superintending Engineer cases wherever negligence, or oversight would result in loss of revenue or property, unprofitable outlay, etc. They should also check the register of meters, history of services, etc. The Executive Engineers should be primarily responsible for the spending of appropriations and see that there are no excesses or lapses.

He should check measure all important works like utilization of conductors in his area and at least 24 works in a year and maintain a register for the purpose and produce it to Audit.

He should see that the initial accounts of works are properly maintained by the Deputy Executive Engineers / Section Officers and that the works accounts are not long kept open by the Field Officers to admit of slow creeping in of discrepancies in the accounts.

The Executive Engineer shall review Meter Reading Registers of the following category of services and shall take immediate action to safeguard the Revenues of the DISCOM.

- a) L.T. Services (which are not high value) Cat. I, II and VII : Half Yearly
- b) L.T. H.V. Services and all Industrial : Quarterly and check readings 40 per month.
- c) H.T. readings 1000 KVA & above : Monthly and check readings of all services in one year.

The Executive Engineer shall review the following exception lists generated by the In-house computer/CAT cell, if the services are repeated more than 3 times in a year and shall take appropriate action to safeguard the DISCOM revenue.

- a) Consumption too high (over 120% of month) (H.V. Services)
- b) Consumption too low (below 80% month) (H.V. Services)
- c) Readings not furnished
- d) Door lock
- e) Disconnected services showing progressive readings (L.V. Services)
- f) Negative readings (L.V. Services)
- g) Comparison of consumption for similar units per HP
- h) Meter stuck up (L.V)
- i) Burnt (L.V)
- j) Services not exists (L.V)

The Executive Engineer should conduct sub-division wise, section wise, 11 KV feeder wise and distribution transformer wise, energy audit, arrive at line losses and take remedial actions to plug the sources of losses and reduce them. He should also furnish division losses to Superintending Engineer/Opn concerned. The guidelines for calculation of line losses for 11 KV & LT system have been communicated.

The Executive Engineer is the administrative head of the EROs. The Executive Engineer should conduct monthly coordination meetings with ERO Staff and field officers and these meetings should be purposeful and effective and should aim at improvement of performance and increase in revenue collections of the division. The Executive Engineer should also inspect one ERO/sub-ERO in a month to satisfy himself that the internal checks prescribed for various activities in billing, assessment of revenue, realization of revenue etc. are strictly implemented.

The Executive Engineer should also inspect all the sub-division offices once in a year, 33/11 KV sub-stations once in six months, H.T. services upto 1 MVA as CMD once in six months and conduct intensive inspections by pooling up all the Deputy Executive Engineers and Section Officers of the Division for not less than four days in a month. He should also conduct detailed investigation of theft of material cases involving more than Rs.5,000/- and upto Rs. 10,000/-.

The Executive Engineers should prepare P & L statement for each section, sub division and division every month.

The Executive Engineer should arrange review of MRBs every month by the DyEEs/AEEs to ensure that the consumption billed for stuck up services/meter changed services is correct and send the report in the prescribed format to AAO (ERO).

He should ensure that the consumer grievances are redressed within the prescribed time including release of new service connections from existing lines within 48 hours.

The Executive Engineer is responsible to keep sufficient no. of healthy DTRs in his head quarters for replacement of failed DTRs. He should arrange transport and erection of the DTRs at the cost of DISCOM only and should not allow the consumer to incur expenditure in this account. He should ensure that all failed DTRs are replaced after thorough inspection of connected LT lines and DTRs structures and rectify the defects before replacing sick units. All the failed DTRs are to be replaced in urban areas within 12 hours and rural areas within 24 hours.

The Executive Engineer should interact and obtain feedback from the consumers on replacement of failed DTRs like whether the transformers are being replaced within resolved time and the expenditure in replacing failed DTRs being incurred by any farmers/ consumers.

DEPUTY EXECUTIVE ENGINEER

The areas to be covered are:

Technical & Commercial: They should inspect the various works and as many of the service connections as is possible and see that they are executed as per standard designs. They should check measure all works costing over Rs.2500 and all service connections costing over Rs. 1,000/- during inspections and make a record of all such check-measurements. As many of the important power service connections as possible should be verified to see that the wiring connection etc., are intact. All the registers pertaining to technical returns due to the Chief Engineer or Superintending Engineer should be reviewed and instructions given to the Subordinates wherever required for maintaining up-to-date records. The return of service connections connected is an important record to watch load developments and should be reviewed by the Assistant Executive Engineer during each inspection.

Financial: The following records maintained by the field are the initial records of accounts and of great financial importance. The Deputy Executive Engineers should see that these are properly maintained and should report all cases requiring attention and rectification to the Executive Engineers.

a) **Cash:** The Deputy Executive Engineers should check the imprest and temporary advance accounts and satisfy that the expenditure was necessary and no amount has been spent unnecessarily or to the advantage of an individual.

b) **Stores:** Forms and stationery, service stamps and stores including spares and tools and plant are as good as cash, the records are containing the numerical accounts, bin cards, stores ledger accounts should be checked in respect of a few items at least during each inspection so that the main important items may be verified completely in the course of the year and discrepancies traced and rectified without undue delay. A report should be made to the A.O. wherever losses are detected for pursuing action by the Circle Office.

c) **Accounts :** The Deputy Executive Engineers are responsible for appropriation, expenditure and revenue should therefore check the initial records of works accounts maintained by the Section Office and should see that the estimates and appropriations are not exceeded or allowed to lapse ; that materials drawn for one work are not utilized on another for which no appropriation is made, that the execution of works are not delayed or protracted resulting in the postponement of revenue earning stage ; that the labour employed is not excessive, etc.

They will completely inspect the offices of the Section Officer in their area once in a year and ensure that the office registers and accounts are well maintained. They will ensure that the work of the subordinates is correct and the technical and filed work upto date. They will go through the arrears list of the Section Offices as to

- (a) Correspondence with consumers ;
 - (b) Correspondence on technical matters ;
 - (c) Correspondence on accounts and pending references of superior officers (and the Circle Office)
- and see that they are dealt with expeditiously and issue necessary instructions as to disposals.

It will be the duty of the Deputy Executive Engineer to regulate expenditure with economy and he should in no case exceed his budget allotments or the estimate amounts without the orders of the Superintending Engineer which should be obtained through his Executive Engineer.

If any excess is seen to be unavoidable during the progress of a work he should submit details to the Executive Engineer promptly who will make his recommendations to the Superintending Engineer for extra funds. Savings foreseen should also be dealt with in a similar manner. Copies of usual communications should be sent simultaneously to the Circle Office.

He should inform all fatal accidents departmental and non-departmental immediately after occurrence of accidents by means of telegram/telephone/fax to the concerned authorities. The same procedure to be followed in case of fatal accidents to animals also. He should submit preliminary reports on all accidents departmental fatal/non-fatal, non- departmental fatal/non-fatal to the concerned authorities within 24 hours. He should also submit detailed report to C.E.I.G. Chief Engineer/Operation concerned Electrical Inspector, Superintending Engineer and Executive Engineer/Elec within 72 hours (3 days) in all accidents cases. In departmental non-fatal cases, non-departmental fatal/non-fatal cases, he should submit within 15 days investigation reports to Chief Engineer/Operation with copies to Superintending Engineer and Executive Engineer.

Deputy Executive Engineer will normally deal with all technical and commercial matters in regard to all consumers and sub transmission lines, but should obtain the orders of Executive Engineer in important matters.

He will check and see that the instructions from the Circle Office are complied with promptly. He should ensure prompt action being taken on consumers' arrears and disconnection notices issued by the Assistant Accounts Officer/E.R.O. Any abnormal conditions (including arrears) will be reported to the Executive Engineer who will report to the Superintending Engineer, if necessary.

The Deputy Executive Engineer is the statutory authority to conduct statutory inspection of 33 KV & 11 KV lines under Indian Electricity Rule 63 and no line should be charged without conducting inspection. The statutory inspection report should be conducted in the prescribed proforma.

The Deputy Executive Engineer is responsible for the general condition of the tools, plant and stores in his area and for the proper maintenance and due submission of the respective accounts by his subordinates. He shall report on all excesses or surpluses and take action on all unserviceable items and for this purpose review the condition of tools, plant and stores not less than once in a year.

The Deputy Executive Engineer shall review meter reading registers of the following category of services and shall take immediate action to safeguard DISCOM's revenue.

- a) L.T Services (which are not high value) : Quarterly (and 100 Cat I, II and VII check readings per month.)
- b) L.T High Value services : Monthly and check (Cat. I, II & VII) and all industrials readings 40 per month
- c) All HT services below 1000 KVA : Monthly readings

The Deputy Executive Engineer should review the following exceptional lists generated by the PAA/in-house computer, CAT cell and arrange inspection, if the service is repeated more than two times in a year, and shall take appropriate action to inspect by himself to safeguard the DISCOM revenue.

- a. Consumption too high (over 120% of normal)
 - b. Consumption too low (below 80% of normal)
 - c. Reading not furnished
 - d. Door lock
 - e. Disconnected services showing progressive readings
 - f. Negative readings
 - g. Comparison of consumption for similar units per HP
 - h. Meter stuck up
 - i. Meter burnt
 - j. Meter Not existing
 - k. Meter Changes
1. Under disconnection for more than 3 months to be dismantled.

The Deputy Executive Engineer should conduct Section wise, 11 KV feeder wise and distribution transformer wise, energy audit, arrive at line losses and take remedial actions to plug the sources of losses and reduce them. He should also furnish sub-division losses to the Executive Engineer/Operation concerned and to submit the action plan to reduce the losses to 6% on all rural feeders first phase and less than 3% in respect of urban feeders.

- a) The Deputy Executive Engineer should inspect all 33/11 KV sub-stations in his jurisdiction once in a quarter.
- b) All high value services of 35 HP and above should be inspected once in a quarter and a quarterly return shall be sent regularly before 5th of the month succeeding the quarter, to Chief Engineer/Operation by the Superintending Engineer/ Operation.
- c) The Deputy Executive Engineer should inspect the Section Offices once in a year.
- d) The Deputy Executive Engineer should review 'A' form register i.e. Pending Service Connection Application Register once in a month.
- e) The Deputy Executive Engineer should ensure that sealing of AB switches of all HT services and terminal covers of all meters.
- f) He should attend all Court cases on behalf of Superintending Engineer/Operation/ DISCOM.

- h) He should conduct detailed investigation in respect of theft of material cases less than Rs.5,000/-.
- i) He should conduct Spandana on every Monday once in a month in each Mandal and he is responsible for redressal of Consumer Grievances as per the citizen charter.
- j) He should review the representations received in Spandana programme and disposed of within time frame specified.
- k) He should review the interruptions to Industrial consumers/dedicated feeders and take remedial measures to bring down the interruption to permissible limits.

The Deputy Executive Engineer is responsible to keep sufficient no., of healthy DTRs in his head quarters for replacement of failed DTRs. He should arrange transport and erection of the DTRs at the cost of DISCOM only and should not allow the consumer to incur expenditure in this account. He should ensure that all failed DTRs are replaced after thorough inspection of connected LT lines and DTRs structures and rectify the defects before replacing sick units. All the failed DTRs are to be replaced in urban areas within 12 hours and rural areas within 24 hours.

The Deputy Executive Engineer should interact and obtain feedback from the consumers on replacement of failed DTRs like whether the transformers are being replaced within resolved time and the expenditure in replacing failed DTRs being incurred by any farmers/consumers being incurred by any farmers / consumers.

ASSISTANT EXECUTIVE ENGINEER/ ASSISTANT ENGINEER (SECTION OFFICER)

The Section Officer who may be an Assistant Executive Engineer or Assistant Engineer has to assist superior officer who is normally a Deputy Executive Engineer in carrying out DISCOM works. The section Officer will normally deal with all technical matters in regards to consumers, Sub-Transmission lines and connected equipment.

The Section Officer is primarily responsible for :-

- a) Prompt disposal of pending service connection applications.
- b) Taking HV meter readings before 10th of the month and send the meter readings registers to ERO by 11th of the month after due review, prompt replies to the exceptional lists communicated by In-house computer/CAT cell ensuring that the meter readings in full shape are made available to In-house computer by 20th at least.
- c) Taking check readings 1 % per month in case of L.T services (which are not high value) Cat. I, II and IV.
- d) Taking monthly readings for all L.T high value services and all industrial services in his jurisdiction.
- e) Prompt action in disconnecting the services included in the defaulter list and in returning the Disconnection list within the prescribed date.
- f) Prompt action in arranging to serve the Current Consumption charges bills to the consumers well before of every month in respect of services covered in other than spot billing system.
- g) Ensuring that accidents are avoided by providing safety appliances to all O&M staff in his jurisdiction and in case of accidents, he should report the matter immediately to the Deputy Executive Engineer.
- h) Conduct 11 KV feeder wise and distribution transformer wise, energy audit, arrive at line losses and take remedial measures to reduce them.
- i) Prompt action in submitting the collections made through Demand Drafts towards Service Connection charges, Consumption Deposits etc. to the Division Office/ERO.
- j) Maintaining initial accounts of the work orders received.
- k) Closing the work orders promptly.
- l) Maintaining the account for the consumables drawn from Deputy Executive Engineer.
- m) Maintenance of all general records in office.
- n) To carry out maintenance of equipment and lines.
- o) Ensuring that guarding between power line and P&T lines are in existence and the following ground clearances are to be maintained for the Over Head lines as per Rule 77 of Indian Electricity Rules 1956.

Ground clearances:

Location of the Line	Low & Medium Voltage	High Voltage
Across the Street	5.8 meters	6.1 meters
Along the Street	5.5 meters	5.8 meters.

Lines erected elsewhere other than the above two cases:

I For low, medium & high voltage ... 4.6 meters lines upto and including 11,000 volts, if bare

II For low, medium & high voltage ... 4.0 meters lines upto and including 11,000 volts, if insulated

III For high voltage lines above 11,000 ... 5.2 meters volts.

IV For extra high voltage lines Shall not be less than 5.2 meters

plus 0.3 meter for every 33,000 volts or part thereof by which the voltage of the line exceeds 33,000 V.

Provided the minimum clearance along or across the street shall not be less than 6.1 meters.

p) Conduct pre-monsoon inspection for both H.T and L.T lines during the month of February & March and rectify the defects noticed at the time of pre-monsoon inspection before commencement of monsoon.

q) Contacting periodically the consumers in various locations to find out the continuity of supply, voltage conditions and allied problems connected with supply.

r) Review of interruptions of all L.T and H.T lines, blowing of transformer section/H.G fuses and take remedial measures to avoid re-occurrence particularly to Industrial consumers/Dedicated feeders.

s) Ensuring that stay sets are provided with guy insulators.

t) The Section Officer should promptly attend the Breakdowns of lines and equipment and the breakdown reports on lines. The maintenance register of distribution transformers, power transformers, and sub-station equipment must be reviewed as per the periodical schedule. The failure of equipment must be reported to Deputy Executive Engineer immediately so that the Deputy Executive Engineer may submit the reports within 24 hours to the higher authorities.

The Section Officer should review the following exceptional lists generated by in house computer/CAT cell and should take prompt action to inspect the same to safeguard the DISCOM revenue.

a). Readings:

- i. Consumption too high (over 120% or normal)
- ii. Consumption too low (below 80% or normal)
- iii. Readings not furnished
- iv. Door lock
- v. Disconnection service showing progressive readings
- vi. Negative readings
- vii. Comparison of consumption for similar units per H.P.

b). Meter Defects:

- i. Stuck up
- ii. Burnt
- iii. Services not existing
- iv. Meter change

3. The section officer is personally responsible to ensure quality in operation, maintenance and construction works in his jurisdiction. The new service connections shall be released as per the standards vide annexure 10A & 10B. He is statutory authority to conduct inspections of LT lines

4. The Section Officer should prepare the handing over report.

CHAPTER – 3

PROCEDURE FOLLOWED IN DECISION – MAKING PROCESS

[SECTION 4(1) (B) iii

Procedure followed in decision-making by the public authority.

Activity	Description	Decision making process	Designation final decision making authority
Goal-setting Planning	1) Releasing of services 2) Reduction of Transformers failures & 3) Reduction of line losses 4) 100% Revenue Collections 5) Raising of Revenue Demand 6) Implementation of APERC Directives	Corporate Office -> Circle Office	Chairman and Managing Director
Budgeting	Allocation of budget upto Division level	Corporate Office -> Circle Office ->	
Formulation of programmes, schemes and projects	Formulation of programmes, schemes and projects	Division Office -> Circle Office -> Corporate Office	
Recruitment/hiring of personnel	Recruitment / hiring of O&M cadre and LDC cadre	Circle Office Corporate Office	
Release of funds	1) Wages and salaries 2) Operation & Maintenance expenses 3) Payment of work bills * Funds will be released from Corporate Office	Corporate Office	
Implementation/delivery of service/Utilization of funds	Implementation/delivery of service/Utilization of funds	Circle Office -> Division Office	
Monitoring & evaluation	To monitor for efficient effective integrated and economical functioning of the organization	Circle Office -> Division Office -> Sub-division Office -> Section Office	
Gathering feedback from public	Conducting District level Constituency level & Village level meetings & through regular meetings as per the guidelines. ,	Circle Office -> Division Office -> Sub-division Office -> Section Office	
Under taking improvements	Works to be taken up under System Improvements, Transmission & Distribution Works & Operation and maintenance works and other Improvement works covered under various scheme	Corporate Office -> Circle Office -> Division Office	

CHAPTER – 4

NORMS SET FOR THE DISCHARGE OF FUNCTIONS

[SECTION 4(1) (B) (IV)]

Sl. No.	Functions / Service	Norms / Standards of performance set	Time frame	Reference document prescribing the norms (Citizen's charter, service charter etc.
01.	Normal fuse off calls	Cities and Towns	Within 4 working hours	<p>As per APERC Regulation No. 7 of 2004 Licensees standards of performance issued by A.P.Gazette Published in Tuesday, June, 22nd 2004.</p> <p>As per APERC Regulation No. 7 of 2004 Licensees standards of performance issued by A.P.Gazette Tuesday, June, 22nd 2004.</p>
		Rural areas	Within 12 working hours	
02.	Overhead line	Cities and Towns	Within 6 working hours	
			Within 24 working hours	
03.	Underground cable breakdowns	Cities and Towns	Within 12 working hours	
		Rural areas	Within 48 working hours	
04.	Distribution Transformer failures	Cities and Towns	Within 12 working hours	
		Rural areas	Within 24 working hours	
05.	Period of Scheduled outage	Maximum duration in single stretch	Not exceed 12 hours	
		Restoration of supply	By not later than 06:00 PM	
06.	Voltage fluctuations	No expansion / enhancement of network involved	Within 10 days	
		Up-gradation of Distribution System Required	Within 120 days	
		Erection of Sub-	Within the time period as approved Station by the commission	

Sl. No.	Functions / Service	Norms / Standards of performance set	Time frame	Reference document prescribing (Citizen's service charter etc. the norms charter,
07.	Meter Complaints	Inspection and replacement of slow, fast / creeping, stuckupmeters	Inspection within 7 days in Town, Cities and rural and replacement within 15 days there after	
		Replace Burnt meters if attributable to licensee	Within 7 days	
		Replace Burnt meters if attributable to Consumer	Within 7 days of receiving payment from consumer	
08.	Application of new connection / additional load connection feasible from existing network	Release of supply	Within 30 days of receipt of application (along with prescribed charges)	
09.	Network expansion / enhancement require to release supply	Release of supply low tension	Within 30 days of receipt of prescribed charges	
		Release of supply high tension 11 KV	Within 60 days of receipt of prescribed charges	
		Release of supply high tension 33 KV	Within 90 days of receipt of prescribed charges	
		Release of supply extra high tension	Within 180 days of receipt of prescribed charges	
		Erection of Sub-station required for release of supply	Within the time period as approved by the commission	
10.	Transfer of ownership and conversion services	Title transfer of ownership	Within 7 days along with necessary documents and prescribed fee. If any	
		Change of Category	Within 7 days along with necessary documents and prescribed fee. If any	
		Conversion from LT 1-ph and LT 3-ph and vice-versa	Within 30 days of payment of charges by the consumer	

Sl. No.	Functions / Service	Norms / Standards of performance set	Time frame	Reference document prescribing the norms (Citizen's service charter etc.
		Conversion from LT HT and vice-versa	Within 60 days of payment of charges by the consumer	
11.	Resolutions of Complaints on consumers bill	If no additional information is required	Within 24 working hours of receipt of complaint	
		If additional information is required	Within 7 working days of receipt of complaint	
12.	Reconnection of supply following disconnection due to nonpayment of bills	Cities and Towns	Within 4 working hours on production of proof of payment by consumer	
		Rural areas	Within 12 working hours on production of proof of payment by consumer	

CHAPTER – 5

RULES, REGULATIONS INSTRUCTIONS, MANUAL AND RECORDS FOR DISCHARGING FUNCTIONS

[SECTION 4(1) (B) (V) & (VI)]

Sl.No.	Description	Gist of contents	Price of the publication if priced

CHAPTER – 12

MANNER OF EXECUTION OF SUBSIDY PROGRAMMES

[SECTION 4(1) (b) xii]

Name of the Programme	Nature / scale of / subsidy	Eligibility criteria for grant of subsidy	Designation of officer to grant of subsidy
Activity			subsidy
Not Applicable			

* No subsidy is provided by this public authority

Name of Programme / Activity	Application Procedure	Sanction Procedure	Disbursement procedure
Not Applicable			

* No subsidy is provided by this public authority

CHAPTER – 13**PARTICULAR OF RECIPIENTS OF CONCESSIONS, PERMITS OR AUTHORISATION
GRANTED BY THE PUBLIC AUTHORITY**

Name of Programme / Scheme :				
Sl.No.	Name and address of recipient institutions	Nature / quantum of benefit of granted	Date of grant	Name and designation of grant authority
Not Applicable				

INDIVIDUAL BENEFICIARIES

Name of Programme / Scheme :				
Sl.No.	Name and address of recipient Beneficiaries	Nature / quantum of benefit of granted	Date of grant	Name and designation of grant authority
Not Applicable				

CHAPTER – 14**INFORMATION AVAILABLE IN ELECTRONIC FORM**

[SECTION 4(1) (b) x (iv)]

Electronic Format	Description (site address / location where available etc.,	Contents or title	Designation and address of the Custodian of information (held by whom)
Website	www.apeasternpower.com	Information regarding Various Schemes	Dy.EE/ Comml. /CO/ RJY Office of Superintending Engineer, Operation Circle, Rajahmundry.

CHAPTER – 15**PARTICULARS OF FACILITIES AVAILABLE TO CITIZENS FOR OBTAINING INFORMATION**

[SECTION 4(1) (b) (xv)]

Facility	Description (Location of facility / Name etc.,)	Details of information made available
Notice Board	Section Offices, Division Offices and Circle Office	Regarding release of service, payment particulars, contact numbers and regarding customer care center and citizen charter.
Pamphlets brochures and advertisements	Distributed an advertised to the consumers at Section Offices, Call Centers and Sub-division Offices and Division Offices	Regarding Customer care centers, Call Centers an all other services done in APEPDCL
Website	Available in Internet www.apeasternpower.com	All the information regarding the company is available
Electricity Call Centers	Centralized Call Center at Visakhapatnam	Ph.No.180042555333 facility fuse of call complaints information
Consumer grievance cell	Circle Office / Rajahmundry	Redressal of the various grievances faced by the consumers

CHAPTER – 16**NAMES, DESIGNATION AND OTHER PARTICULARS OF PUBLIC INFORMATION OFFICERS**

[SECTION 4(1) (b) xvi)]
